

The important interaction between science and advocacy at influencing European politics

EKHA meeting Milan

June 16, 2023

Raymond Vanholder, EKHA President

Eveline Scheres, EKHA General Manager

Agenda

- Short intro on EKHA and its advocacy endeavours.
- How the activities of EKHA and ERA complement each other.
- Introduction to the European Institutions (interactive Quiz)
- Q&A
- Call to action: support the EKHA manifesto that will be launched ahead of the European elections in spring 2024

Strengthening the work of our network by means of advocacy

is *the* European Nephrology advocacy platform in which a broad scope of organisations and individuals work together for healthy kidneys and the benefit of people with kidney diseases.

The EKHA platform connects the following groups of the Nephrology world:

Physicians

Nurses

Patients

Foundations

Individuals

Commercial partners

Members of European Parliament (22)

- EKHA is a **non-profit organisation** whose aim is to propose solutions for the challenges of Chronic Kidney Disease in Europe **through EU-level advocacy**.
- EKHA works on the principle that the issue of kidney health and disease must be considered at European level and that **both the European Commission and European Parliament have vital roles to play in assisting national governments** with these challenges.
- EKHA advocates for more **effective prevention and a more efficient care pathway** intended to facilitate the **provision of high-quality care and affordable treatment to all Europeans equally**.

EKHA members in 2023

5 FULL MEMBERS:

30 AFFILIATE MEMBERS:

10 SUPPORTERS:

EKHA is a member of **ecda** and **EU4health**

EKHA ambitions, goals and instruments

EKHA MISSION

Less people to develop CKD, slow down progression of CKD and better quality of life for CKD patients.

EKHA VISION

Engage EU politicians to change EU policy to lower the socio-economic burden of CKD by creating awareness & urgency on CKD being a neglected disease in all stages.

STRATEGIC GOALS

Prevent people from getting kidney disease.

Improve **disease management** by educating politicians, care givers (GP's, Specialists) and scientists on the impact of unhealthy kidneys.

Push for **innovative green therapies** for kidney patient accessibly to all European patients and for fair prices

Include **CKD as a research priority** of the European Commission.

INSTRUMENTS

Advocacy expertise

Scientific Content

EKHA working groups

Patient engagement

Communication

Collaboration

EKHA Working groups

In 2021 EKHA starting with 3 working groups. The groups exist of people of EKHA member organisations and people from the nephrology world who contribute with their **expertise on nephrology**. They carry out tasks and actions to achieve, amongst other, the 3 strategic goals of EKHA. In 2021 they started with the following tasks:

WG1: Prevention & screening

Research via a survey to:

- analyse existing screening programs in primary care in Europe;
- to understand the general attitude to – and use of – CKD detection/screening in GP practises;
- to evaluate the feasibility of screening for kidney disease.

WG 2: Disease Management

Research for need and use of a Disease Management Toolbox, to provide kidney patients with a practical tool to better manage kidney disease in all stages. This tool should also be helpful to nurses, nephrologists, general practitioners and other specialists in supporting patients tackling their disease.

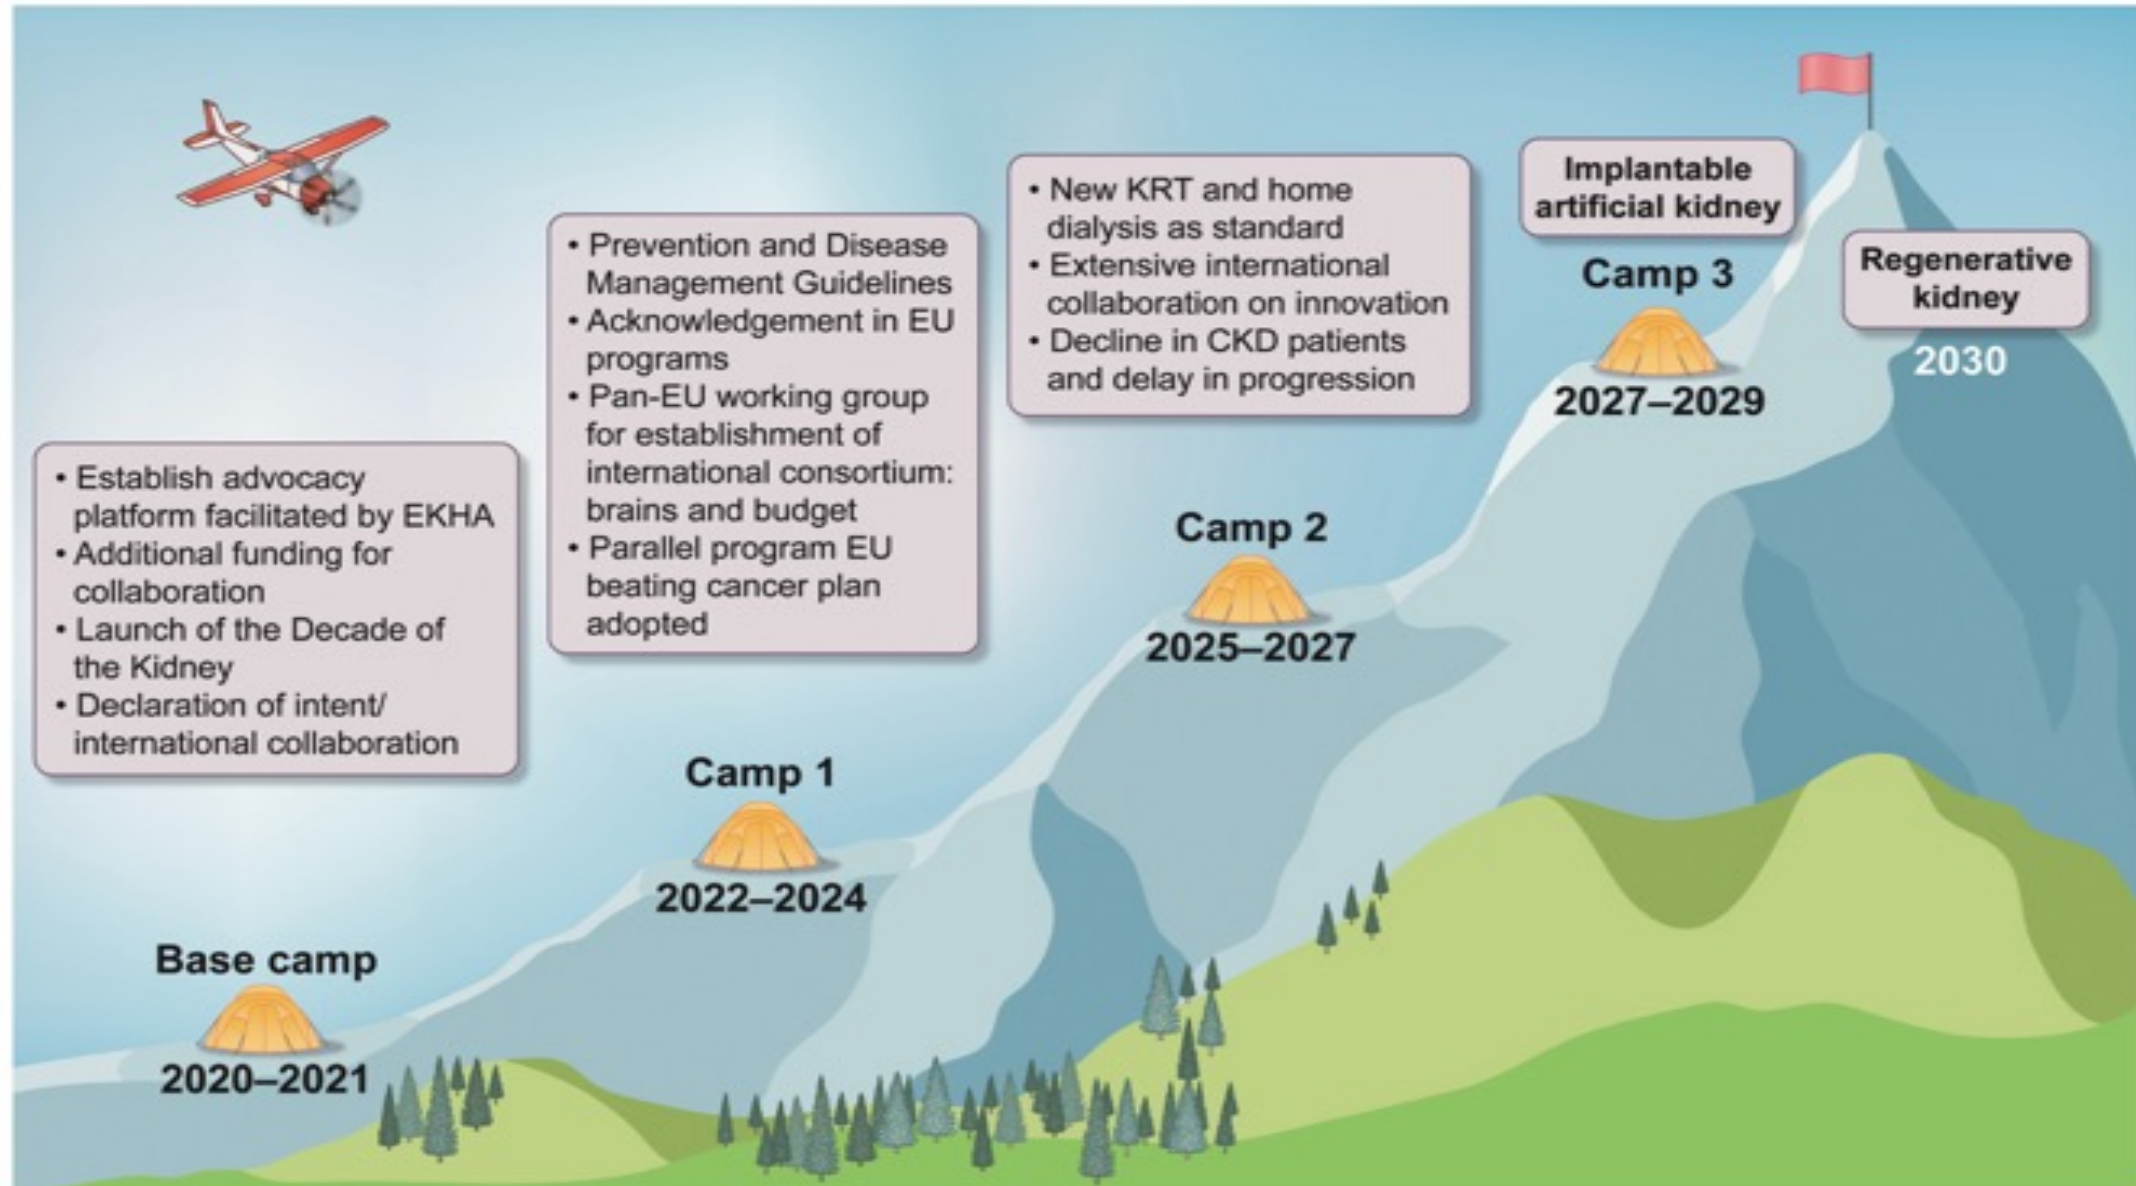

WG 3: Ground Breaking Innovation

Collaboration to push for an international framework for new innovative and affordable Kidney Replacement Therapies (KRT's) in response to Horizon Europe's Strategic Orientations for Research and Innovation and the Advancing American Kidney Health (AAKH) Executive Order

Aside from the working groups, EKHA installed an **AMBASSADOR GROUP** that exists of people living with kidney disease. Their tasks are to reflect on the output of the working groups, represent the patient voice in political meetings and provide patients insights on EKHA's strategic goals. These Ambassadors are therefor incorporated in the one of working groups.

Decade of the Kidney™ mission strategy

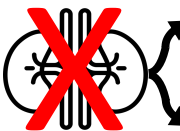

Where science meets advocacy – EKHA projects 2023

- PREVENTCKD:** to enhance CKD screening, data on prevalence and incidence, best practices and the creation of a CKD prevention code. The project is funded by the EC and supported by AstraZeneca, in collaboration with members of EKHA working group 1 and the following consortium partners:
 - EKPF — EUTOX – IMEC – ISN – RENALOO
- Exploration of a self management tool** for people living with CKD (funded by Baxter) in collaboration with members of EKHA working group 2.
- Facilitate Home Haemodialysis care for chronic dialysis patients** in Europe (funded by Mozarc) in collaboration of a working group constructed of experts in the nephrology field (nephrologist, nurses and patient).
- Establishment of an international consortium for ground breaking innovation** in collaboration with:
 - Patient organisations EKPF and AAKP;
 - The co-chairs of the MEP Group For Kidney Health and (Hilde Vautmans and Ondrej Knotek)
 - the Co-Chairs of the USA bi-partisan Congressional Kidney Caucus Congressman Larry Bucshon and Congresswoman Suzan DelBene,
 - Members of EKHA working group 3

The world urgently needs *drastically* better Kidney Replacement Therapies !

Kidney Failure: Present therapies are inadequate!

Kidney Failure
(End Stage Kidney Disease) means:
Without Kidney Replacement Therapy
You Die!

Transplantation

Best & cheapest available KRT option, **but:**

- Structural Shortage of Transplant Kidneys, many Patients Die, while still on the Waiting List
- Immune suppression drugs prevent transplant rejection but also increase Risk of Cancer & Infections
- Still up to 25% shorter remaining Life Expectancy

Dialysis

Most widely used available KRT option, **but:**

- Substitutes max 10-15% of kidney filtration function
- Does not substitute all other kidney functions
- Significantly lower Quality of Life than Transplantation
- More Expensive & Resource-heavy than Transplantation
- Up to 70% shorter remaining Life Expectancy

Dialysis is associated with...

Low Quality of Life

Health-related Quality of Life for dialysis patients is

↓ 27% – 49%
worse than for the general population

High Cost to Society

Dialysis is resource-heavy, costing up to

€80,000 or \$89,000
per patient per year, depending on the country and dialysis method

High Mortality

5-year survival on dialysis is

lower
than for most cancer treatments

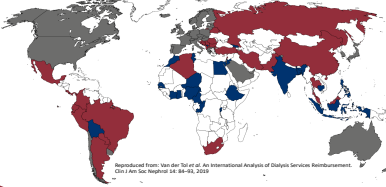

Annual death risk of dialysis patients is

10 – 100x
higher than in general population

2/3
of patients die without KRT access

Covid-19 makes it even worse!

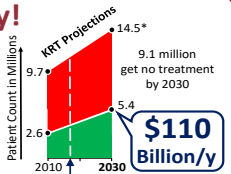

World-Wide Costs Keep Rising Unsustainably!

Yearly Dialysis Cost & Country Wealth

- \$ 1.7 Bn/y, low/low income
- \$ 9.7 Bn/y, upper-middle income
- \$45.7 Bn/y, high income countries

\$57.1 Billion/y spent in 2016
(note: excl. transplants & AKI)

KRT Projections

2010: 2.6 million patients
2030: 9.1 million patients (9.7 million with access, 0.6 million without)

\$110 Billion/y

Legend:
■ Patients with access to KRT
■ Those dying without access to KRT

Bundle the Best Brains to Build Better Treatments!

Where science meets advocacy – a snapshot of activities

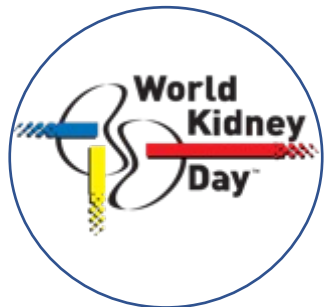

EKHA Recommendations on CKD prevention, treatment and care to inform EU policies and initiatives

Annual European Kidney Forum in the European Parliament hosted by the MEP Group for Kidney Health

Regular meetings with policy makers from the European Parliament, European Commission and Member-States

Annual EU policy-focused campaign on World Kidney Day

Peer-reviewed articles on CKD with a policy angle (34)

Active posting on EKHA social media (Twitter and LinkedIn)

Scientific papers on issues concerning CKD in 2023

In 2023 EKHA President Raymond Vanholder was main author or co-author of 7 scientific articles on CKD. The latest is:

- Vanholder et al, **A policy call to address rare kidney disease in health care plans**. Clin. J. Am. Soc. Nephrol. Available from: Doi: 10.2215/CJN.0000000000000220

Also our working group members publish scientific articles:

- Wieringa et al, **Coordinating efforts to optimize next-generation kidney replacement therapies: the European Kidney Health Alliance work group 'Breakthrough innovation**. Clin. Kidney J., 16, 885-890, 2023

And more articles will follow soon!

- In Nat Rev Nephrol: on **inequities and vulnerable populations** (WKD 2023 theme)

Science meets advocacy

- Announcement of the European Kidney Forum in J Nephrol
- Article in Health Quarterly Issue 25: **Improving care and awareness of CKD, written by Raymond Vanholder and Eveline Scheres**

Campaigns and events with strong ambassadors (2023)

World Kidney Day

Awareness-raising campaign 'Show Your Kidneys Love' with Tina Turner

Online campaign: written conversation on the vulnerability of kidney patients during disastrous events

Celebrating 80 years of dialysis: Time again for science fiction

Successful event in the European Parliament, hosted by MEP Knotek (Czechia), commemorating the invention of dialysis & reminding the urgency of innovation.

The event was organized in close collaboration with Fokko Wieringa, Phd (chair EKHA of working group 3 on ground-breaking innovation) who created [a short movie on the inspiring live of Dr. William Kolff](#)

Annual policy event in the European Parliament

2023 European Kidney Forum

MEP Group for Kidney Health event

THE FUTURE OF KIDNEY CARE

Investing in green nephrology to meet
the European Green Deal Targets

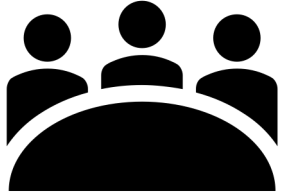

28 June 2023, 15:00 -17:00 CEST

European Parliament Brussels, SPAAK 7C50

Hosted by MEP Hilde Vautmans, MEP Juozas Olekas, MEP Ondřej Knotek

EKHA advocacy achievements

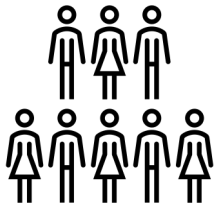

CKD mentioned in high-level parliamentary debates

EU funding secured for CKD prevention and early diagnosis

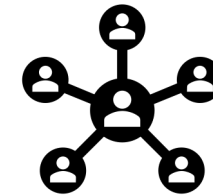

CKD included in key EU reports, initiatives and policies

The CKD community represented annually in the European Parliament

EKHA seen as a go-to partner for any EU initiatives on kidney disease

Strong network of EU policy makers established to support efforts on CKD

EKHA communication achievements

Growing network on social channels

EKHA @EKHA_EU · 22h

Experts & policymakers will address the environmental impact of kidney care & how green nephrology can help achieve the #EUGreenDeal Targets at the #EKF2023

2023 European Kidney Forum
MEP Group for Kidney Health event
THE FUTURE OF KIDNEY CARE
Investing in green nephrology to meet the European Green Deal Targets
28 June 2023, 18:00 - 17:00 CEST
European Parliament, Brussels, SP/SAK, PC/SG
Hosted by MEP Jussara Chikwa, MEP Jussara Chikwa, MEP Ondrej Kizisek

Programme
Chaired by: Tamsin Rose

- 15:00-15:15 Opening remarks**
 - MEP Jussara Chikwa, Co-Chair, MEP Group for Kidney Health
 - MEP Jussara Chikwa, Member, MEP Group for Kidney Health
 - MEP Ondrej Kizisek, Co-Chair, MEP Group for Kidney Health (Moderator)
- 15:15-15:20 Setting the scene**
Kidney health and the environment: a neglected bidirectional link
 - Prof Raymond Vanholder, President, European Kidney Health Alliance
The energy crisis and dialysis care: how are patients and health systems coping?
 - Ms Fiona Loud, Policy Director, Kidney Care UK
- 15:30-16:40 Panel discussion: Joining forces to improve kidney health and foster greener nephrology practices**
 - Prof Georges Pignatelli, Nephrologist, Nephrology Service, Le Mans Hospital Centre, France
 - Dr Boris de Zeeuw, President and Scientific Board Chair, European Kidney and Transplant Nurses Association/European Renal Care Association
 - Dr David Gallejo, President, European Kidney Patient's Federation
 - Ms Petra Lemay-Casteln, Policy Officer, Innovative Health Initiative, DG for Research and Innovation, European Commission
 - MEP Jussara Chikwa, Member, MEP Group for Kidney Health
 - Ms Andrea Santini, Director of Programmes, Healthcare Without Harm Europe
 - Dr Fabian Wessing, Principal Specialist, Central Health Services Department, IMC, The Netherlands
 - Ms Charlotte Buffaux, European Policy and Advocacy Advisor, Renalco
- 16:40-16:50 Concluding remarks**
 - Commissioner Stella Kyriakides, Commissioner, DG Health and Food Safety, European Commission
 - Prof Raymond Vanholder, President, European Kidney Health Alliance
- 16:50-17:00 EKHA Declaration of Intent & Guiding Principles**
- 17:00-18:20 Networking reception**

Fiona Loud and 9 others

ERA versus EKHA

Collaboration to strengthen mutual goals

	ERA	EKHA
Expertise	<ul style="list-style-type: none"> • Expert education • Top quality scientific knowledge • Professional networking 	<ul style="list-style-type: none"> • Advocacy • EU policy • EU health legislation and initiatives • Creating awareness about kidney diseases
Complementarity	<ul style="list-style-type: none"> • Scientific knowledge provided by ERA feeds the advocacy work of EKHA 	<ul style="list-style-type: none"> • Information provided by EKHA and advocacy efforts by EKHA benefit ERA and help ERA reaching its goals
Tools	<ul style="list-style-type: none"> • Congresses, courses, webinars • Working groups • Fellowships • Nephrology journals • Registry 	<ul style="list-style-type: none"> • Fora and meetings in the European Parliament • Meetings with EU policymakers, administrators, members of the European Parliament • Working groups • Round tables / webinars
Membership	<ul style="list-style-type: none"> • Individual members with interests in nephrology • Mostly nephrologists 	<ul style="list-style-type: none"> • National and international nephrology societies and organisations in Europe • Representing nephrologists, patients, nurses, foundations, industry, providers • Collaboration with Members of EU Parliament

Shared goals of ERA and EKHA

ERA' GOALS

Promoting kidney health for all

- Prevent people from developing kidney disease
- Develop a global vision about kidney health beyond borders

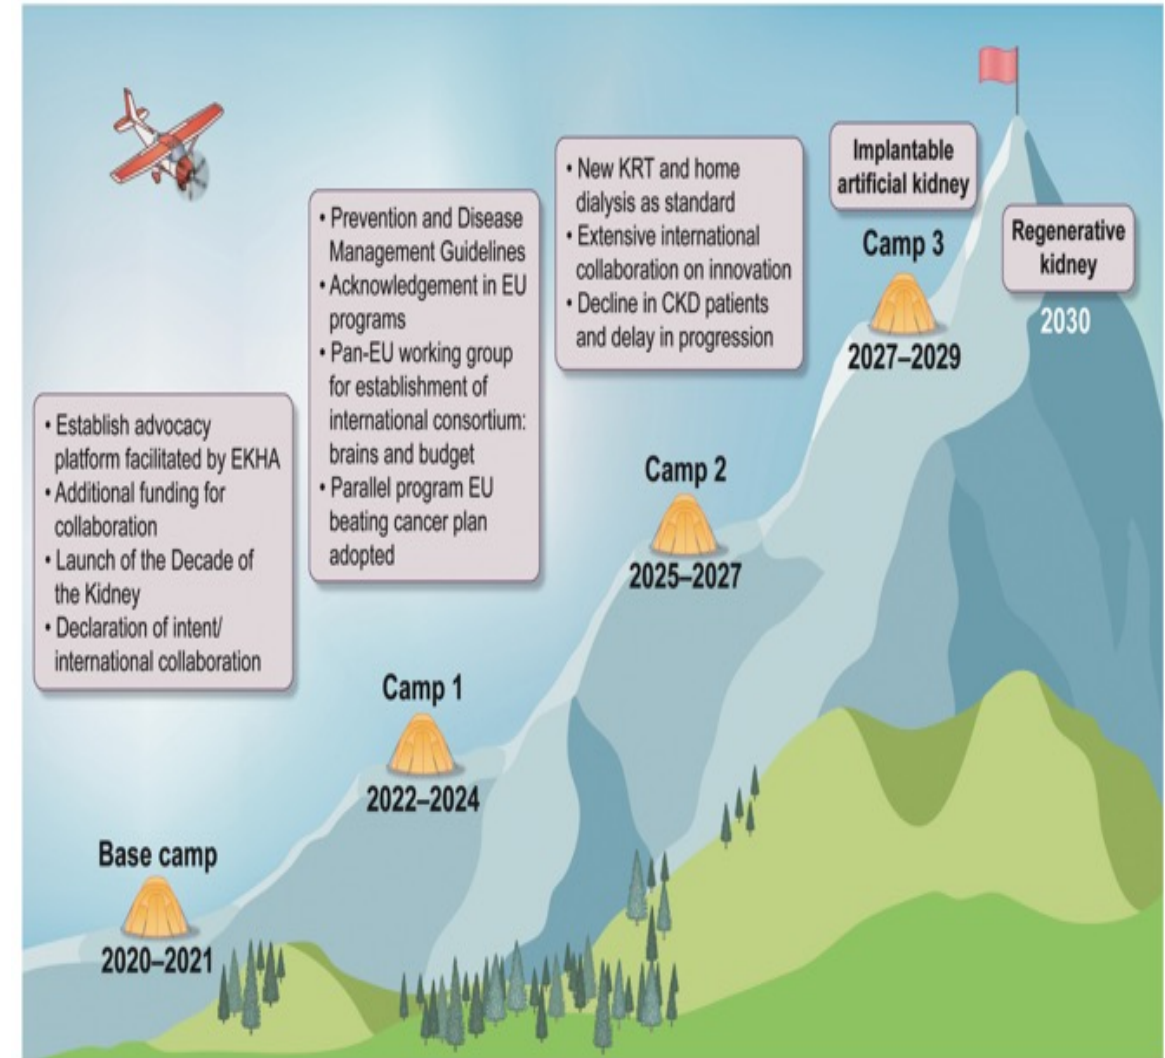

Improving kidney care for patients

- Promote equity of access to kidney diagnosis and treatment across Europe
- Generate respect for the patient voice

Strengthening the kidney community

- Foster a stronger sense of identity and community among members
- Reconsider the role of the modern nephrology professional specialist to inspire the next generation
- Address the pressing issues of nephrology workforce shortage and promote personnel recruitment and continuity

EKHA'S MISSION STRATEGY

Welcome to Europe Quiz! Live interaction

(not included in this slide deck but available
via eveline.scheres@ekha.eu if wished for)

European elections

Advocacy Priorities ahead of 2024 European Parliament Elections

EKHA key recommendations, short- and long-term objectives, concrete asks

Foster innovation in kidney disease treatments

Call on the EU to stimulate research, development, and green innovation of therapeutic alternatives for CKD, preferably in a international consortium

Organ donation and transplantation

Call on the EU to address the long-standing challenges in organ donation and transplantation

Potential ask: A 2nd EU action plan

Kidney Manifesto
